

Activity 3: Create a new folder in My Drive and add files

Now it's your turn. You can upload multiple types of files to Drive. In this activity, you create a new folder and practice downloading, uploading, and converting files.

Complete the following steps:

1. Create a new folder.
 - a. Go to drive.google.com and select **My Drive**.
 - b. Select **New** and create a folder named "On the Rise".
 - c. Double-click the new folder to open it.
2. Open the following files by clicking each of the links and download them to your device:
 - a. [French baguettes recipe.docx](#) (Word document)
 - b. [Cinnamon bun final.jpg](#) (Image file)
3. Close the browser tabs containing the files downloaded in the previous step.
4. Return to your "On the Rise" folder.
5. Select **New, File upload**, then select the two files you have just downloaded, and press **Open** to upload them to your Google Drive.
6. Convert the Word document to a Google Doc.
 - a. Open the document "French baguettes recipe.docx" with Google Docs.
 - b. Select **File** and **Save as Google Docs** to save a Google Docs version of the file.
 - c. Close the Google Docs and Word versions of the file. You should now see a Google Doc version alongside the Word version in your "On the Rise" folder.
